OPTECO A1 & SPORTECO H1

ARCROON

OPTECO A1 **ECONOMIC HP**

- **Wide Rib with variable depth steel groove, effectively avoids airflow and other frequency vibration, reduces tread running noise, at the same time, prevents entrainment of gravel, reduces abnormal wear, and improves tire using life.**
- **Smooth asymmetric pattern, ensuring better controlling performance of outside while enhancing drainage of inside. Four wide deep grooves keep excellent wetting performance and handling stability.**
- **Outside tire shoulder design with wide pattern block keeps excellent handling performance. Stiffener design greatly improves the controlling performance when driving on the curve road, effectively preventing abnormal wear.**
- **The middle block adopting continuous wide rib design ensures the guiding performance of the tire. The wide driving surface improves the straight-line driving stability and ensures the braking performance of the vehicle, which makes the vehicle more comfortable during driving.**

SPORTECO H1 **ECONOMIC HT**

- **Four straight drainage grooves provide good grip and effective drainage for safety driving on slippery road.**
- **The silent groove is designed with multiple steel plate patterns, which effectively reduces the driving noise of tires on all terrains, and greatly improve grip and handling performance.**
- **Reinforced shoulder design effectively improves driving stability under high loads.**
- **The transverse thin steel sheet with wide rib at the center gives the tire reasonable longitudinal rigidity and excellent high-speed driving performance.**
